

International Journal of Pavement Research and Technology

Volume 8 / Number 2

MARCH 2015

Editor's Corner

- IV Updates on Two TxDOT's Research Implementation Projects
Dar Hao Chen

Technical Papers

- 63 Creep Response of Asphalt Concretes: Visco-Elasto-Plastic Modeling
Marco Pasetto and Nicola Baldo
- 72 Sensitivity of Road Unevenness Indicators to Distresses of Composite Pavements
Peter MUČKA
- 85 Numerical Modelling of Thermal Cracking of Pavements
Aruna Amarasiri and James Grenfell
- 94 Effects of Mineral Admixtures on Microstructure-linked Strength Properties of Macro-synthetic Fiber Reinforced Concrete
Rui He, Juan-lan Zhou, Ping-ming Huang, Bo-wen Guan, and Yan-ping Sheng
- 103 Swelling Behavior of Electric Arc Furnace Aggregates for Unbound Granular Mixtures in Road Construction
Federico Autelitano and Felice Giuliani
- 112 Pavement Maintenance Prioritization of Urban Roads Using Analytical Hierarchy Process
Akash C. Prakashan, Devesh Tiwari, Yogesh U. Shah, and Manoranjan Parida
- 123 A Comprehensive Analysis for Obtaining Consistent HDM-4 Results: Case Study with a Local Council in Australia
M. U Khan¹ and P. J. Higgins
- 131 Experimental Study and Numerical Simulation of Tension and Stress Relaxation of Hot-Applied Sealant for Asphalt Pavement
Feng Li, Yuan Zhou, Tinggang Li, Wei Zeng¹, and XianGuo Wang

Technical Notes

- 142 Effect of High Friction Surface Treatment on the Onramp Merging Length
Chiu Liu and Zhongren Wang
