

International Journal of Pavement Research and Technology

Volume 8 / Number 3

MAY 2015

Editor's Corner

- IV Empa, Road Engineering/Sealing Components Laboratory
Manfred N. Partl

Technical Papers

- 147 A Mechanistic Empirical Approach Utilizing Controlled Tolerable Deflection for the Design of Thin Surfaced Asphalt Pavements
Mofreh Saleh
- 153 Validation of a Hydraulic Model to Prevent Emulsion Flowing in Chip Sealing
Felice Giuliani, Gilda Ferrotti, Antonio Montepara, and Francesco Canestrari
- 159 Performance Evaluation of Fog and Rejuvenating Seals on Gap and Open Graded Surfaces by Caltrans
DingXin Cheng, Lerosé Lane, and Peter Vacura
- 167 Intrinsic Roughness Mitigation of Pavements on Expansive Soils - an Analytic Investigation
Eyal Levenberg
- 172 Optimum Blending Requirements for EVA Modified Binder
Nikhil Saboo and Praveen Kumar
- 179 The Meso Structure and Strain Distribution Analysis of Cement Emulsified Asphalt Concrete
Jun Fu, Xiaoqiang Zhang, and Fazhou Wang
- 185 Evaluation of Horizontal Curve Superelevation Using Road Surface Profiler (RSP)
Mojtaba Abbasghorbani, Armin Bamdad Ziksari, Ebrahim Shoormeij, and Sina Brazvan
- 192 Performance Modeling of Open-Graded Friction Course Pavements
Nadeem Anwer Qureshi, Donald Watson, Bilal Khurshid, and Anwaar Ahmed
- 199 Effect of Interaction Parameters on the Hardness and Elastic Modulus of Crumb Rubber Modified Asphalt
Mohyeldin Ragab, Magdy Abdelrahman, and Amir Ghavibazoo
- 206 Development of a Budget-Prioritized Pavement Management System based on Engineering Criteria
Suraj Gowda, Sumit Jain, K. S. Patil, Krishna Prapoorna Biligiri, and B. E. Prabhakar
