IJPRT has ushered into a new era. After several months of communication with Publisher Elsevier, the world-leading provider of information solutions and publisher for over 2,500 journals, IJPRT officially signed the contract with Elsevier for Production and Hosting Services. Starting from the 1st issue of Volume 9, January 2016, IJPRT will be hosted by Elsevier and all papers will be produced by Elsevier. Most importantly, IJPRT will remain open access online!

As time flies, IJPRT is approaching the end of the eighth year since the Journal published its first issue. In the past eight years, with the participation, dedication, and contribution of the editors, reviewers, and authors, the Journal has made significant strides in becoming a high-quality international journal. As a scientific journal, IJPRT's highest goals are to promote its impact and to provide the best services for our professional community.

Starting December 2015, the paper submission and review processes for IJPRT will be conducted via Elsevier website. The rollout of the dedicated journal homepage for IJPRT will be on Elsevier.com and EVISE's system will be handling the online submission and peer-review management. The detail information on how to use online procedures will be available soon. Over 400 papers published in Volume 1 to Volume 8 of IJPRT will still be accessible at www.ijprt.org.tw for free.
